**AND GOD SAYS . . .**  
**One of the things we studied this week in Vacation Bible School was the human brain. I learned several things that I didn't know before.**

First, I learned that the human brain has approximately the same number of neurons on the surface of the brain as the Milky Way has stars, almost 100,000 billion. This is important because neurons enable the brain to send and receive signals from the brain.

Second, the human brain sends signals at approximately 250 miles per hour, much faster than the fastest computer made.

Third, the memory in the human brain has unlimited capacity. It can never be filled. Therefore we never have to remove data from our brains in order to learn more things—unlike computers which have limited memory.

Fourth, the folds in the brain provide more surface area so that there can be more neurons so that more information can be received and sent.

Fifth, 80% of the growth of the human brain occurs by the time a person is two years old. That is why the baby has a soft spot in the top of the skull which enables the skull to expand as the brain grows.

The thing is, when I considered this information about the brain, I thought, "Isn't it something, that "evolution," which has no intelligence and creates things purely by accident, can create something so phenomenal as the human brain when our best intelligence can't create a computer with anywhere near the memory of the brain or with intelligence of its own. At least that is what evolutionists want us to believe.

A much better explanation is that we are "fearfully and wonderfully made," (Psalm 139:14) in the image of our creator (Genesis 1:27). To me, it is much easier and takes much less faith to believe in an intelligent Creator than an evolutionary accident to create something so complex and spectacular. I guess the truth is that evolution is really a matter of blind faith after all.

**Come and say farewell to a great father, brother, cousin and friend.**

*In the words of our father: When I Must Leave You "When I must leave you for a little while, please do not grieve and shed wild tears and hug your sorrow to you through the years. But start out bravely with a gallant smile. And for my sake and in my name, live on and do all things the same. Feed not your loneliness on empty days, but fill each waking hour in useful ways. Reach out your hand in comfort and in cheer, and I in turn will comfort you and hold you near. And never, never be afraid to die, for I am waiting for you in the sky!"*
