MEASLES

I have never seen a case of measles. No doctors I have worked with have seen measles. I know doctors who specialize in infectious disease who may have seen measles, but I am not sure.
That's how rare measles has become. But this great success is also a problem. Since nobody remembers how dangerous measles can be, lies are spread about the disease and the cure.

Measles (Rubeola) is most common in children. The virus can incubate in a person 12 days before they feel sick. The illness starts with high fevers, cough, runny nose and red watery eyes. Tiny white spots may appear inside the mouth. After 2-4 days, a rash starts on the head and spreads down the body. The fevers can reach 104° F.

Common problems from measles can include diarrhea and ear infections. But 1 in 20 children with measles will get pneumonia. 1 in 1000 children will get encephalitis (swelling in the brain). This can cause seizures, hearing loss and problems thinking and learning. 1 – 3 children out of every 1000 die. A very rare fatal nerve disease can appear even 10 years after the infection.

Measles is especially dangerous to children under age 5, pregnant women and people with weak immune systems. Measles is contagious 4 days before until 4 days after the rash starts.
It spreads easily. While a person with COVID may spread it to two others, a person with measles can spread it to 16. Ninety percent of unvaccinated people exposed to measles will get the disease. Twenty percent will have to be hospitalized.

The measles vaccine was developed in 1954 from blood of an infected boy. It was available by 1961. Measles cases dropped worldwide when the vaccine came into use. In 1971, the vaccine was combined with the mumps and rubella vaccines and has been used now for over 55 years. Two doses of the MMR are 97% effective in preventing measles. The vaccine of course has risks. Seizures due to fever have happened in 0.04% of children between 12 and 16 months - and happen more often if the vaccine is delayed. No deaths have occurred from giving the MMR to healthy people. Babies under 6 months old and people with weak immune systems cannot take the vaccine. They are protected from measles because those around them have been vaccinated.

This has been a very bad year for measles. 4,852 cases have been reported – twice as many as last year. Eight people have died, including one infant in Wisconsin just weeks ago.
Between 1991 and recent years there were never more than 4 deaths in a single year in the U.S.

With vaccine sceptics leading our public health system, this dangerous disease made a comeback.

THANK YOU JACKSON COUNTY!

I would like to thank the citizens of Jackson County for reelecting me as the Jackson County Sheriff. The campaign was long and grueling, but your continued support, determination, and encouragement allowed all of us to stay focused on what is best for Jackson County. Law enforcement and public safety serve as a foundation for the stability and success of our community. The rule of law, protecting individual rights, and creating a safe environment for our communities is my priority. When we feel safe in our homes, schools, and workplaces, then we can thrive and live without worry or fear. I will continue to work hard and do my best to serve Jackson County.
It is an honor and privilege to be your Sheriff.

I would like to recognize and give special thanks to my family, friends, co-workers, professionals and all their families for their commitment and dedication to the campaign. We could not have done this without your help. Words cannot express our appreciation.
Rhonda and I really appreciate all of you.
Thank you for your continued support.
Now let's get back to work.

Sincerely,
Duane and Rhonda Waldera

"FOXY"

Foxy is the CCHS Pet of the Week!

This beautiful 6-year-old American Eskimo weighs 19 pounds and is ready to find someone she can trust. Foxy came to us from an Amish rescue and, understandably, she can be a little nervous when meeting new people. She may need some time and patience to feel comfortable, but once she knows she's safe, she's ready to discover what it means to be loved. Foxy is so very, very pretty with her fluffy white coat and foofy tail! Foxy is looking for a patient person who will let her take things at her own pace and show her that the world can be a wonderful place. With the right person by her side, this little diva has the potential to truly blossom. Foxy is ready for her chance to trade nervous beginnings for a life filled with love, comfort, and plenty of pampering! You can submit your adoption application for Foxy on our website: www.cchs-petshelter.org/applying-to-adopt.

Save the Date! Santa and Mrs. Claus are returning to CCHS this year for our annual Pet Pictures with Santa & Mrs. Claus! They will be at the Shelter on December 5th from 1:00 p.m. - 4:00 p.m. They do a wonderful job and are happy to take pictures with all kinds of pets, from cats and dogs to rats and goats! Pictures are then available for purchase as prints, email or on a flash drive. So bring your pets and make some great Holiday memories! More details are available on our website.
